80 Projects

Project Outline

Project Overview:

- This is an existing project that needs to be stabilised and refactored
-

Project Outline

- In order to determine a roadmap going forward, the frontend and api...

Pre-requisites

Required Components:

1. Code Capsules account for the sandbox environment/demo instance - complete
2. Appstrax Services
3. Frontend code base
4. Backend code base

Project Specifications

- **Contract Duration**
 - weeks, months, sprints
 - Date from:, Date to:
- **Project Line Items Overview**

1. Site improvements and correction(once off)	Projected Sprint
- Frontend -	2.5
- Backend -	2.5
Total	5 sprints

Project Specifications

- Project Line Items Overview

2. Monthly Retainer	Projected Cost
- Code Capsules hosting	R 1000
- 4 development hours per month (R1250 per hour) -	R10 000
Total	R11 000 per month

Quotation

Software Development

Payment Info

Line Item	Timelines/Delivery	Hours
Frontend Development	sprint	
Backend Development	sprint	
Total		hours

Line Item	Timelines/Delivery	Cost
Design	1 sprint	
Total	weeks	R25 000

Line Item	Hours	Cost
Monthly retainer	20	10 000
Hosting		1 000
Total	20	R11 000 pm

A typical Sprint would be two weeks, 80 hours of consistent dev.

Project timeline is divided into Sprints @ 2 weeks/sprint

Hourly Rate: \$75 per hour / ZAR 1250 (ex VAT)

Rights Management

Terms & Conditions

Please note the terms and conditions will be accompanied within the formal contract

Please note this proposal contains the estimates for the project completion and may change based on further requirements gathered.

This proposal needs to be accompanied with the software services contract, which will be sent upon agreement of the estimated costs.

The rights to the source code and IP belong entirely to The Client without any exception.

Observation: Appstrax Technology will not own the software license, intellectual property, and code.
